OBJECTIVE

Seeking a challenging position in a progressive organization with an aim to contribute positively toward my objectives and healthy growth of my career and the organization. To enhance my skills, Knowledge and gain experience. I can fully utilize my skills and services in a competitive and professional environment to work honestly and effectively to fulfill the tasks assigned to me.

EDUCATION

BS Computer Engineering | COMSATS UNIVERSITY ISLAMABAD, Lahore
Campus

2018 – 2022

FSC (Pre-engineering) | Superior College Toba Tek Singh 2016 – 2018

What will I bring for you?

I have strong Grip in React JS Frontend along with many 3rd Party JS libraries that make frontend more engaging. I have used pure JavaScript and apply it using React JS. I also have experience in Node JS, Express JS and Mongo DB with Authentication and Validation using JWT Token and CRUD Operations. I have worked with external API to fetch data from API's and display data on frontend. I have also worked with pure JavaScript, HTML and CSS.

SKILLS

- HTML / CSS / Tailwind CSS
- C / JAVASCRIPT
- Data Structure
- Database
- Bootstrap
- React JS
- Node JS with Express
- SQL / Mongo DB

PROJECTS

Restaurant Website

This website is designed and developed for Anime theme base Digital Restaurant. This website has Homepage, Shop, Sign UP/ Sign In/ About page and Cart. It is a MERN Application where clients can register for Membership and their Data will be stored in Mongo DB. It also has working Cart where clients can select item for ordering purpose and can see selected items in cart. I have used React JS, JavaScript, HTML, CSS to build it. [Link to Frontend](#)

Weather APP

I have used Weather API from Rapid API Hub and use it in my portfolio website. You can find temperature and other measurements by searching the name of city. I have used React JS, JavaScript, HTML, Tailwind CSS to build it. Click on weather in Projects to see this project. [Link](#)

Super Hero APP

I have used Super Hero API and build a Super Hero App where you can see the complete details of your Favorite Super Hero. I have used React JS, JavaScript, HTML, Tailwind CSS to build it. Click on Super Heroes in Projects to see this project [Link](#)

Rock Paper Scissors Game

It has been built using pure JavaScript where you can play Rock Paper Scissor with computer. I have used React JS, JavaScript, HTML, Tailwind CSS to build it. Click on RPS in Projects to see this project. [Link](#)

Portfolio Website

It is complete MERN Application built using Tailwind CSS, HTML, JavaScript and other JS libraries. User can Sign up and then Login with same Username or Email and password. After login, you can also visit your profile and see you submitted data. I have used JWT Token for user authentication and validation where registered users can only see their data not others. Click on Portfolio MERN to watch complete video of functionality. [Link](#)

Interest

I am more of an introvert and currently pursuing my fitness goals. I am very good at table tennis and I often listen podcasts on Spotify and YouTube.
